KLOUDBOX RMC ERP Modules

Sales Module

Manages sales processes and customer interactions.

Stock Module

Tracks and manages stock levels and movements.

Payments Module

Processes incoming and outgoing payments efficiently.

Quality Check Module

Ensures product quality through inspection and testing.

Purchase Module

Handles procurement and supplier management tasks.

Maintenance Module

Schedules and manages equipment maintenance activities.

Payroll Module

Manages employee salaries, deductions, and taxes.

GPS Tracking Module

Tracks vehicles and employees using GPS technology.

Key Features of KLOUDBOX RMC Cloud ERP

1. **Anywhere, Anytime Access** (browser & mobile app)
2. **Subscription-Based Model** (no heavy upfront cost)
3. **Automatic Updates & Maintenance**
4. **High Security** (encryption, role-based access, backups)
5. **Scalable** (easy to add users, storage, branches)
6. **Multi-Company, Multi-Branch Support**
7. **Integration Ready** (APIs, payment gateways, CRM, GPS, IoT)
8. **Real-Time Dashboards & Reports**
9. **Mobile Approvals & Field Access**
10. **Collaboration Tools** (workflow approvals, document sharing)

1. **Sales Module**

•Customer Master Management (Profiles, GST, Credit Limits)
•Quotation / Estimate Creation & Tracking
•Sales Order Management (Approval Workflow)
•Delivery Challan & Invoicing (GST Compliant)
•Pricing Rules & Discount Management
•Sales Return & Credit Notes
•Sales Analytics Reports by customer, product
•Integration with Inventory for stock availability check

Unified Sales Process

2. Purchase Module

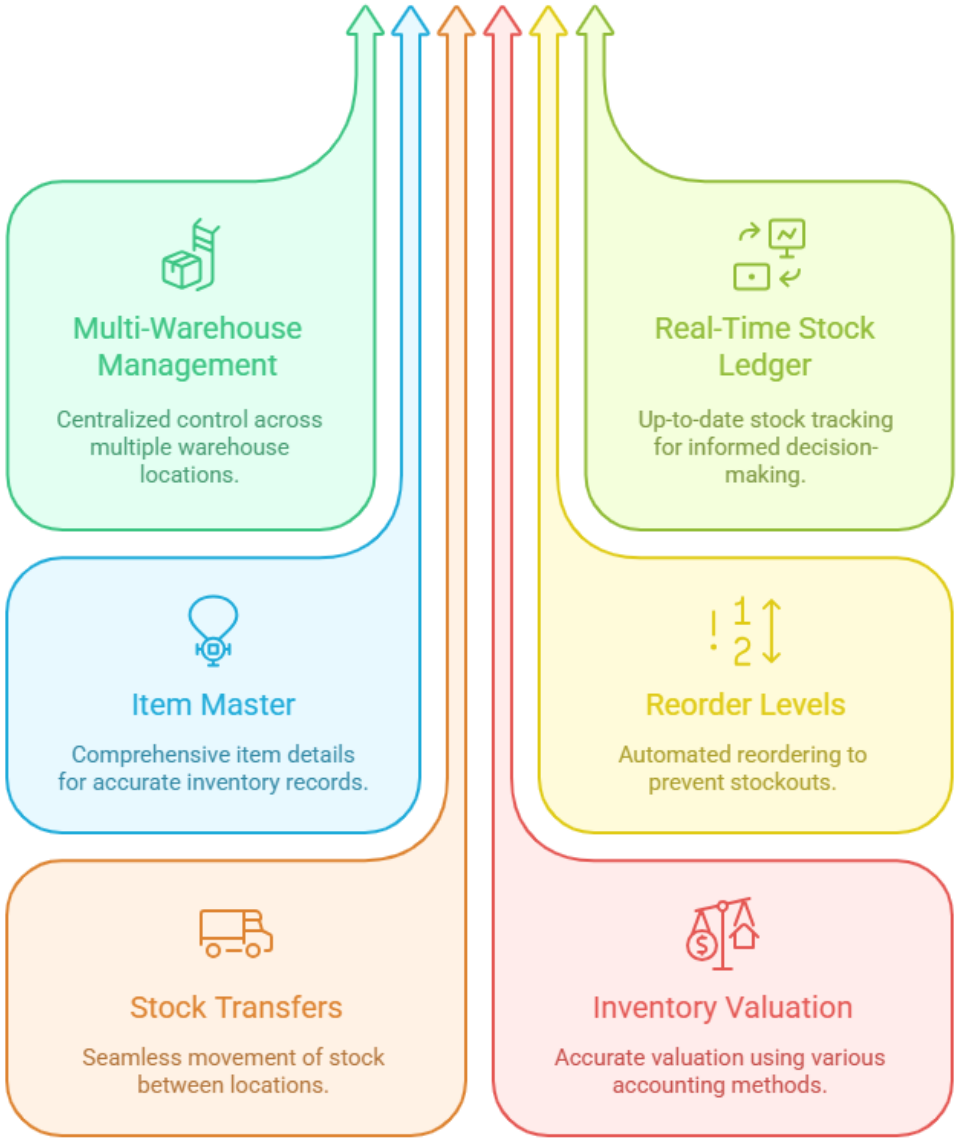
- Supplier Master Management (Profiles, GST, Payment Terms)
- Purchase Requisition (PR) & Approval Workflow
- Request for Quotation (RFQ)
- Purchase Order (PO) Creation & Tracking
- Goods Receipt Note (GRN) & Quality Check
- Supplier Invoice Processing
- Purchase Return & Debit Notes
- Supplier Performance Reports
- Integration with Inventory for auto stock updates

Purchase Management Process

3. Stock / Inventory Module

- Multi-Warehouse / Location Management
- Real-Time Stock Ledger
- Item Master (SKU, HSN Code, Batch, Serial Number)
- Reorder Levels & Auto Replenishment
- Stock Transfers (Warehouse to Warehouse / Site to Site)
- Stock Adjustments (Damage, Expiry, Shrinkage)
- Batch / Lot / Serial Tracking
- Inventory Valuation Methods (FIFO, LIFO, Weighted Avg.)
- Stock & Reconciliation Reports

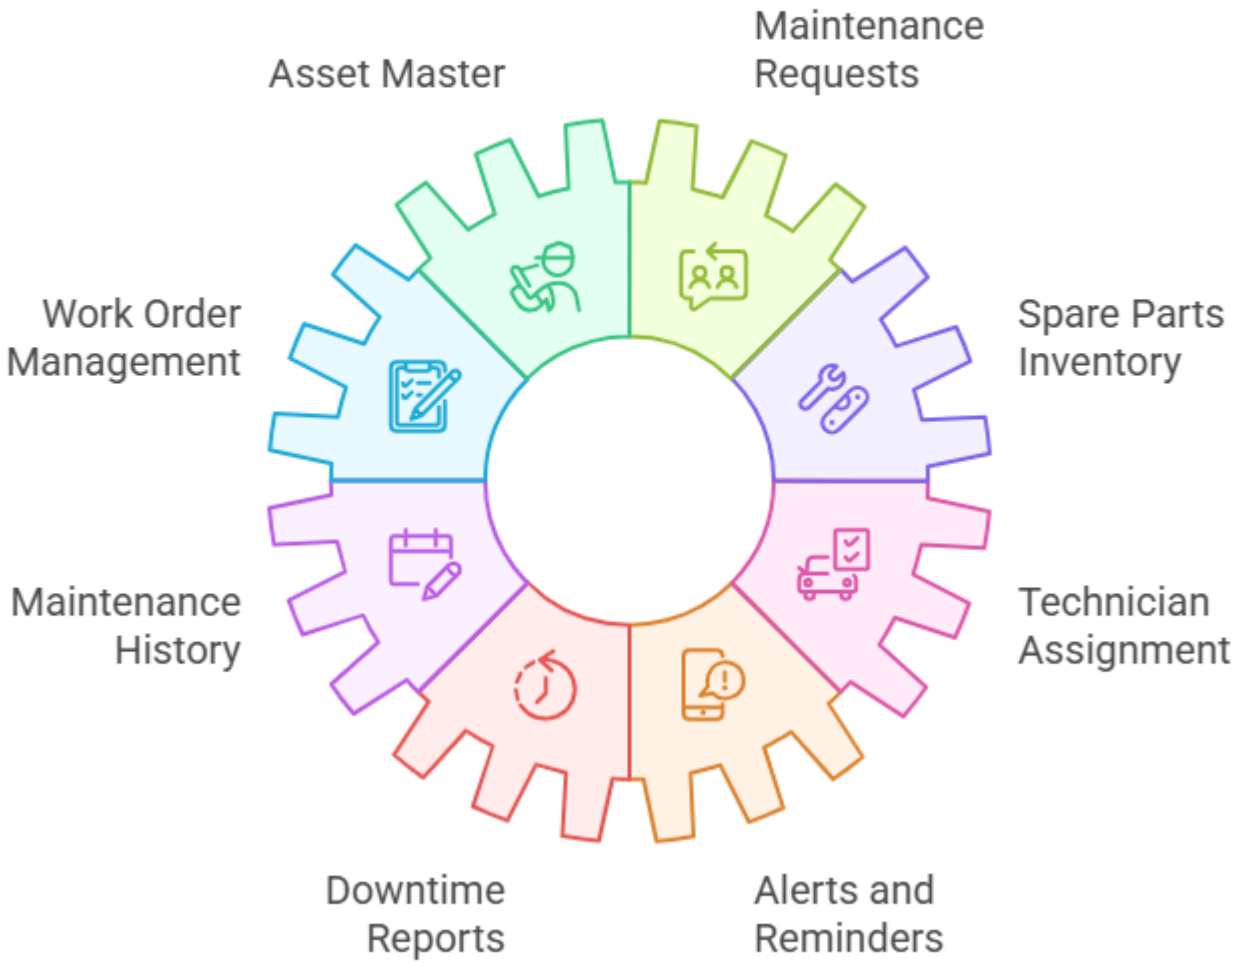
Streamlining Inventory Operations



4. Maintenance Module

- Asset Master (Plant, Machinery, Vehicles, Tools)
- Breakdown / Corrective Maintenance Requests
- Work Order Management for Maintenance Jobs
- Spare Parts Inventory Control
- Maintenance History & Cost Tracking
- Technician Assignment & Job Tracking
- Downtime Reports
- Alerts & Reminders for Service Due Dates

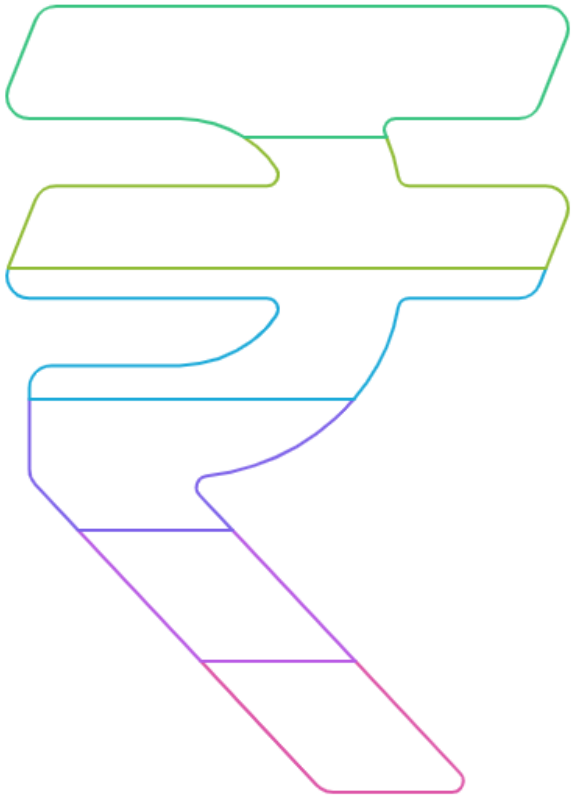
Comprehensive Maintenance Management System



5. Payments (In & Out)

- Customer Receipts (Cash, Cheque, Bank Transfer, UPI, Card)
- Vendor Payments (Advance, Partial, Full Settlement
- Payment Voucher Management
- Integration with Sales & Purchase Invoices
- Outstanding Payables & Receivables Dashboard
- Aging Reports (Receivable / Payable)

Comprehensive Financial Management Overview



Customer Receipts

Handling various payment methods from customers

Vendor Payments

Managing payments to vendors with different settlement options

Payment Voucher Management

Organizing and tracking payment vouchers

Invoice Integration

Connecting payment processes with sales and purchase invoices

Outstanding Payables & Receivables Dashboard

Providing a visual overview of outstanding financial obligations

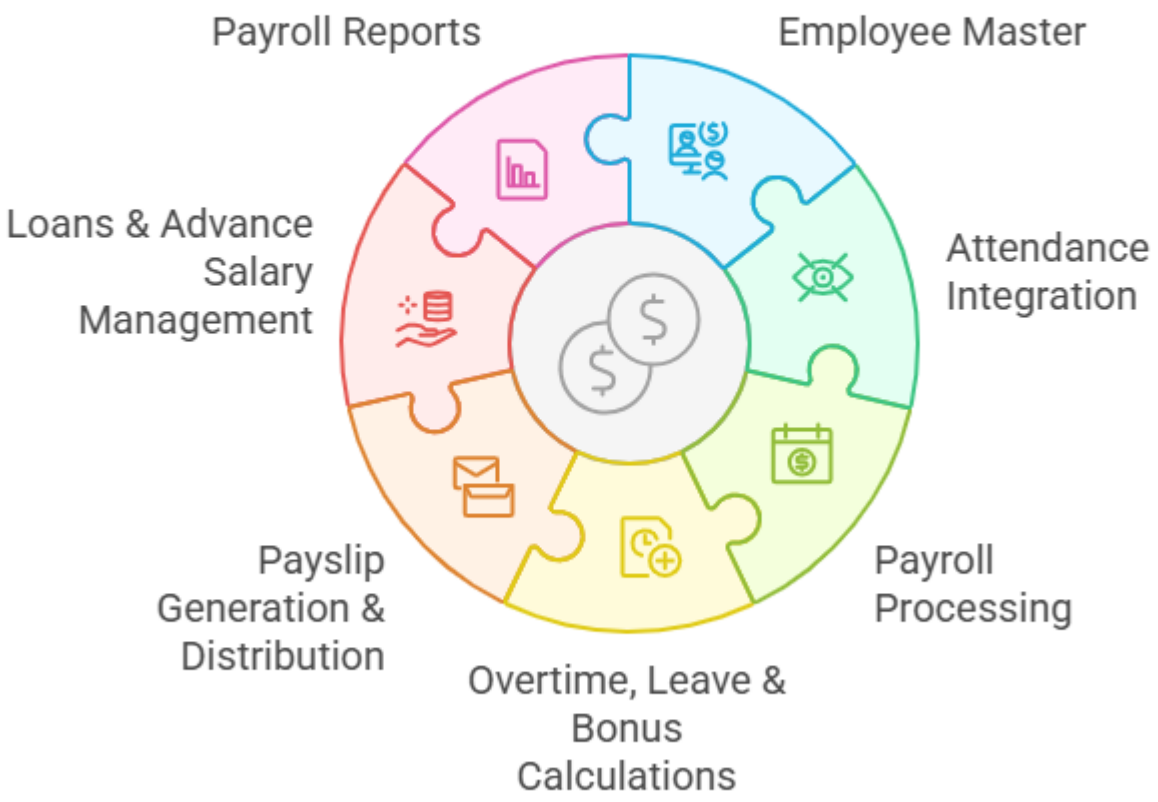
Aging Reports

Analyzing the age of receivables and payables

6. Payroll Module

- Employee Master (Personal, Job, Salary, Tax Info)
- Attendance Integration (Biometric, Timesheet, Manual)
- Payroll Processing (Monthly, Weekly, Daily)
- Overtime, Leave & Bonus Calculations
- Payslip Generation & Distribution (PDF/Portal/Email)
- Loans & Advance Salary Management
- Payroll Reports (Salary Register, Cost to Company)

Payroll Management Overview



7. GPS Tracking Module (Vehicles & Employees)

Vehicle Tracking Features

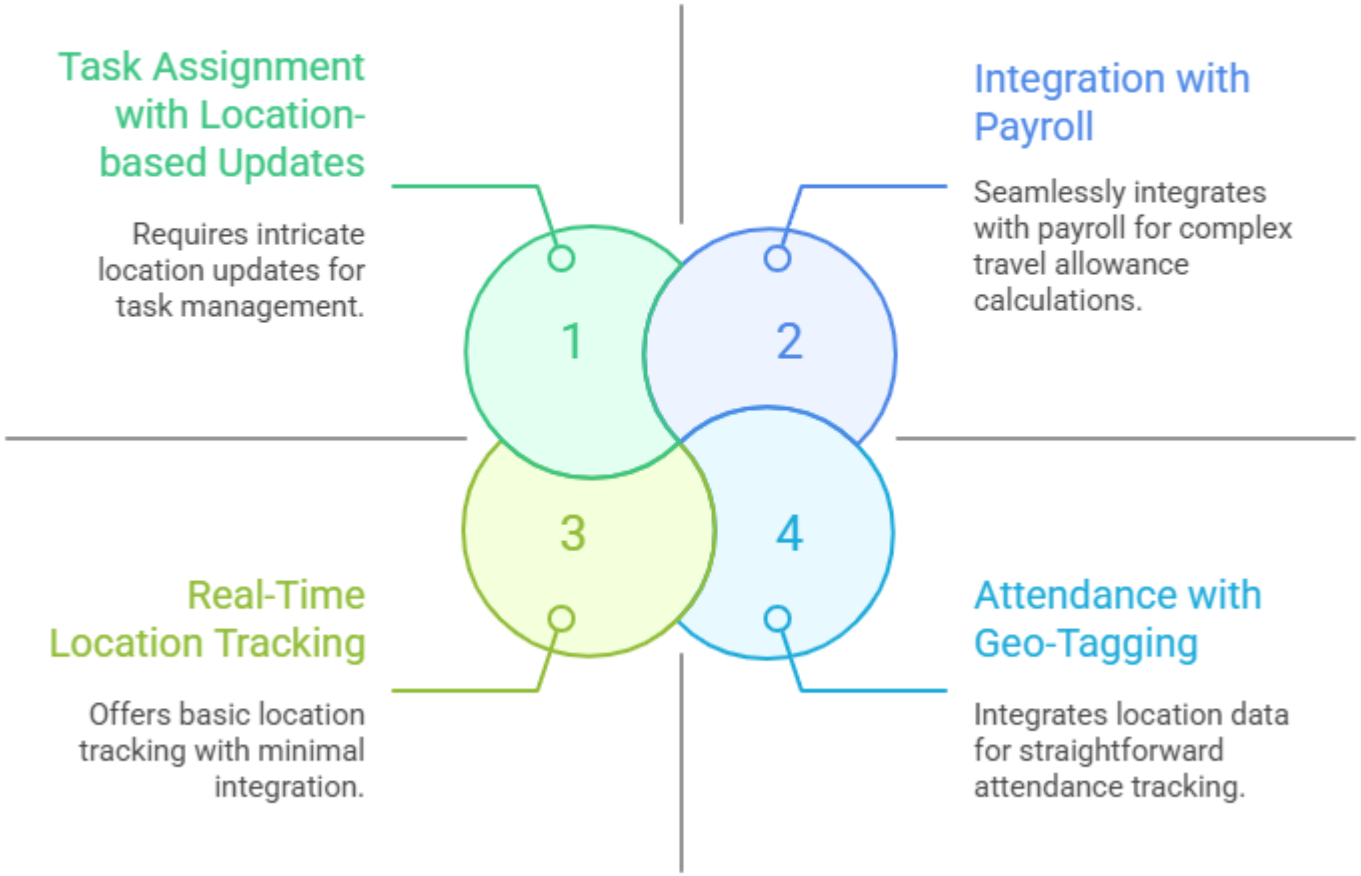
•Real-Time GPS Location Tracking (Map View – Google/Mapbox/Valhalla)
•Trip History & Playback (Route taken with timestamps)
•Geofencing (Alerts when vehicles enter/exit defined zones)
•Fuel Monitoring (integration with IoT/fuel sensor)
•Speed Monitoring & Overspeed Alerts
•Idle Time & Stop Reports
•Maintenance Scheduling based on mileage/hours run
•Integration with Delivery & Dispatch Module (Live ETA to customers)
•Route Optimization & Suggested Shortest Path
•Vehicle Utilization & Cost per km Analysis

Comprehensive Vehicle Management System

Employee Tracking Features

- Real-Time Location Tracking (via Mobile App GPS)
- Attendance with Geo-Tagging (Clock-in/out with location)
- Field Force Monitoring (salespersons, service engineers, delivery staff)
- Route History & Meeting Logs (customer visit tracking)
- Task Assignment with Location-based Updates
- Expense Reimbursement with GPS-based Travel Distance Capture
- Productivity Reports (time spent in transit vs. at customer location)
- Integration with Payroll (auto calculate travel allowance)

Location-Based Workforce Management Features



Task Assignment with Location-based Updates

Requires intricate location updates for task management.

Integration with Payroll

Seamlessly integrates with payroll for complex travel allowance calculations.

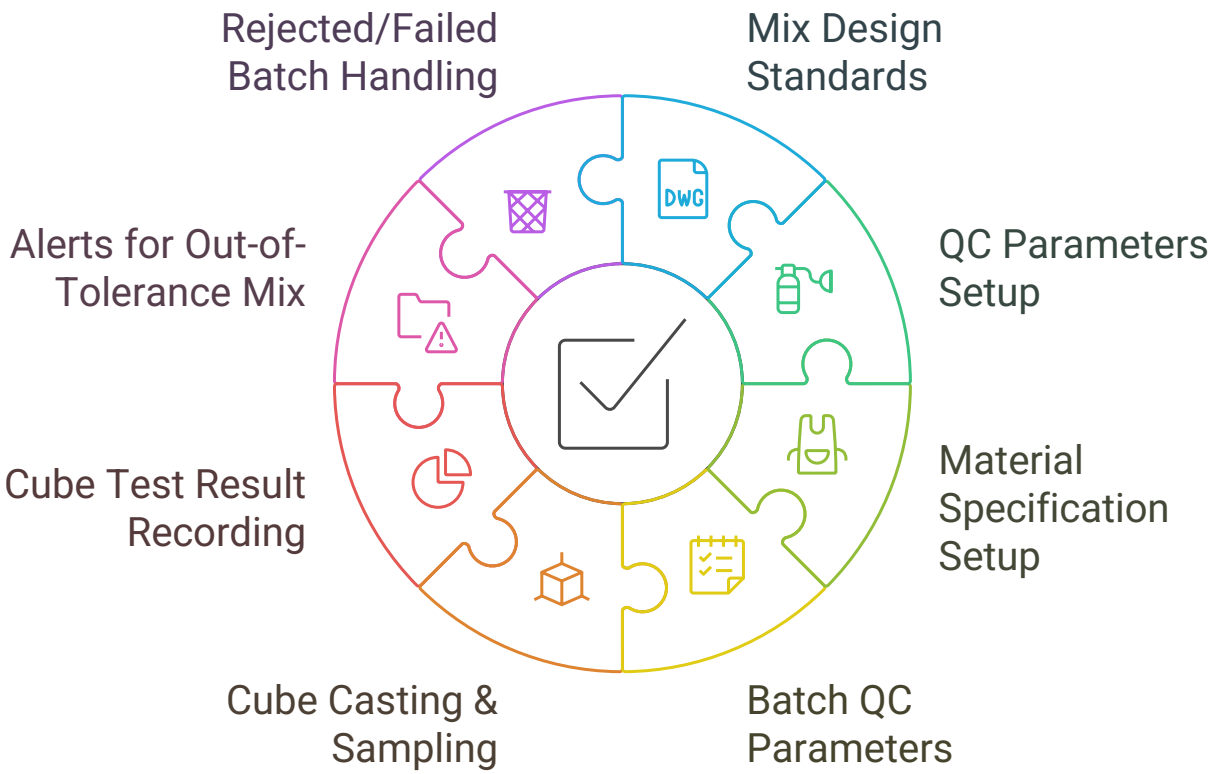
Real-Time Location Tracking

Offers basic location tracking with minimal integration.

Attendance with Geo-Tagging

Integrates location data for straightforward attendance tracking.

7. **Quality Check (QC) Module**

- Mix Design Standards (M10, M20, M25, etc.) as per IS/ASTM codes
- QC Parameters Setup (slump, compressive strength, water-cement ratio, temperature)
- Material Specification Setup (cement grade, aggregates, sand, admixtures)
- Batch QC Parameters: slump, temperature, admixture dosage
- Cube Casting & Sampling (auto-generate cube ID & curing log)
- Cube Test Result Recording (7-day, 28-day strength tests)
- Alerts for out-of-tolerance mix (e.g., W/C ratio, weight deviation)
- Rejected/Failed Batch Handling (diversion, recycle, report)


Quality Control in Construction
